

BOYS AND GIRLS WILL BE TAUGHT DURING SUMMER

Raton and Springer Educators Employ Instructors to Carry on Work in Agriculture and Home Economics.

SPECIAL CORRESPONDENCE TO MORNING JOURNAL

Raton, N. M., April 25.—That Colfax county educators are continually striving to better educational facilities was demonstrated by the action of the school boards of Raton and Springer last week.

Provision was made by each of these boards for the employment of an instructor during the summer months, who will have charge of boys and girls who are engaged in agricultural and home economics work. This action of the public schools adds a much-needed phase to present day education in Colfax county as it assures proper direction to the boys and girls during the summer months.

Competent instructors will be secured at an early date and practical instruction will be given in cooking, sewing, poultry raising, livestock raising, and the production of field crops. Book study in these subjects is already included in the regular course of study, but this work will provide for the actual practice of these things.

Mr. J. H. Toulose, federal assistant in charge of club work in northern New Mexico, and V. L. Martineau will co-operate with the instructors who are employed in the supervision of the work.

The Women's Progress club of Springer and the Raton Woman's club did much to encourage the establishment of this new work as they are taking an active interest in boys and girls' club work. Their interest in trying to assure more profitable employment of boys and girls during the summer months should be much appreciated by the public and especially the parents of these children.

Home Economics Short Courses. The ladies turned out in excellent manner to attend the demonstrations and lectures which were given at Cimarron last Monday, Tuesday and Wednesday by Miss Gail Ritchie, state demonstrator of home economics for the New Mexico Agricultural College.

After the meetings were over the ladies decided that scientific cooking and home management were nothing more than good common sense, practical cooking and management, just as scientific farming is good common sense management of the farm.

Fishings were held in Cimarron. The first consisted of a lecture on food values. Demonstrations in cooking of meals and meat substitutes, bread-making, cake-making and preparation of salads were given. One-half day was devoted to canning vegetables and fruits by the cold pack process. An iceless refrigerator was exhibited which called forth much favorable comment.

Meetings were held in French and at the county school on Thursday and Friday.

Schools similar to that held at Cimarron will be given at Miami and Springer during the present week.

FOR THE GROWING BOY

with his need of the most nourishing and body building food, there is nothing better than plenty of our bread. Spread with butter, jelly or jam, it will be as toothsome as it is nourishing and will satisfy any boy, no matter how finical his taste or voracious his appetite. Try it for a few days and note results.

CHICAGO BOARD OF TRADE.

Chicago, April 25.—Growing confidence that the crisis with Germany would not cause a break in diplomatic relations had much to do with a fresh advance today in the value of wheat, and so had stormy weather in the spring crop belt. Prices closed strong, 1 1/2 to 2 1/2 per cent higher, with May at \$1.13 1/2¢ and July at \$1.14 4/4¢.

Other leading staples, too, scored gains for the day—corn, 3/4 to 9/16¢; oats, 1/2 to 3/4¢, and provisions, 15¢ to 27 1/2¢.

In the wheat market formed the rule except right at the outset, when owing to lower quotations from Liverpool, some hesitancy was evinced. Export sales in the east aggregating 50,000 bushels counted further in favor of prices.

Corn hardened chiefly in sympathy with wheat and as a result of seaboard demand. Oats were governed by the action of corn and wheat.

Lard went to a new high price record for this season, and continued to lead an advance in provisions. The unusual demand for lard was explained as reflecting not only big export transactions, but also the scarcity of materials for the manufacture of glycerin.
